

OPENING UP PLYMOUTH'S DATA

For people to
play with

**Digital Futures and
Open Data play day:
9.30am — 2.30pm
Friday 27th November
Devonport High School for Boys**

You are invited to the digital futures and open data Play day.

At a time when the digital sector is rapidly growing and influencing all aspects of the economy, it's a brilliant time to get interested in developing your understanding, expertise and potential role within the digital sector. The day is being hosted by Devonport High School for Boys but open to any school group in the city. The day is open for students from year 7 to year 13 but particularly relevant for post 16 students.

Part one:

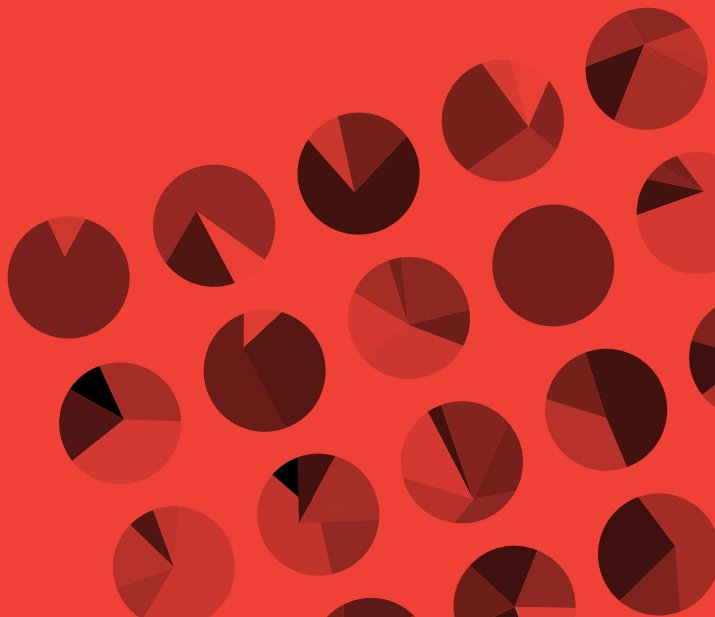

The event will introduce students to some of the exciting “digital” developments in the city. It will include an opportunity to find out about the Market Hall building and an opportunity to hear from some key players in the digital development of the city.

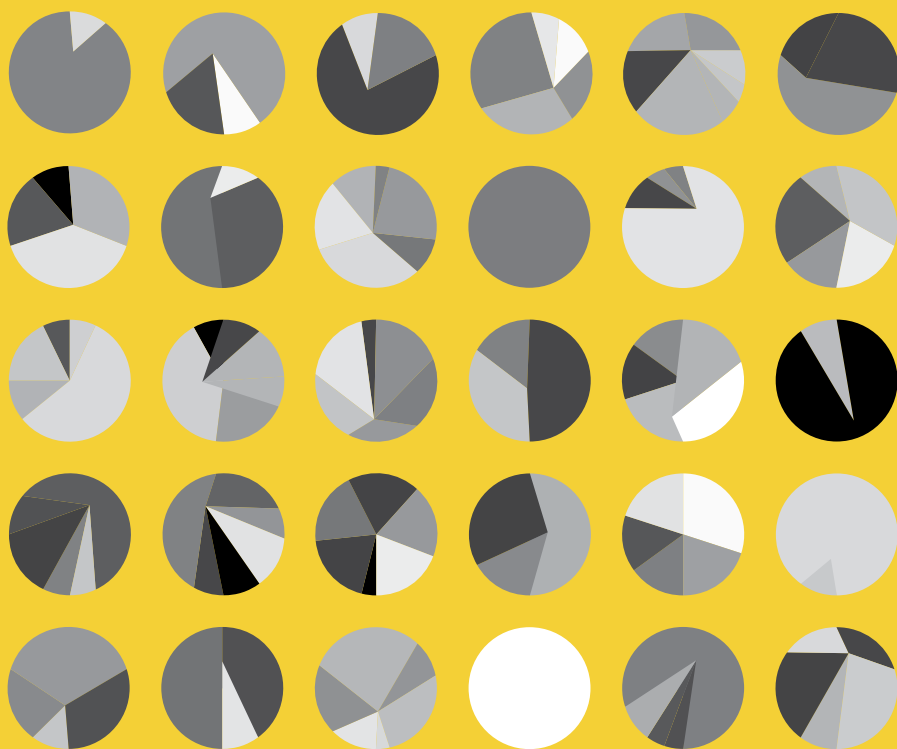

Part two:

Students will find out about open data, work in groups to explore some of the latest data sets that have been released by Plymouth City Council and experiment and play with how this could be used. This might result in ideas for interactive maps, apps, APIs, websites, games and much more.

By the end of the day the students will have developed some exciting product concepts for how the data could be used, be excited by digital developments in the city, and be introduced to the idea of the Digital Futures leadership programme, an intensive leadership programme for young people interested in going further with digital.
